

Program:

```
public class ReverseNumber {  
  
    public static void main(String[] args) {  
  
        int num = 1234, reversed = 0;  
  
        while(num != 0) {  
            int digit = num % 10;  
            reversed = reversed * 10 + digit;  
            num /= 10;  
        }  
  
        System.out.println("Reversed Number: " + reversed);  
    }  
}
```

Output:

Reversed Number: 4321
